Curriculum Vitae

Energy Industry

Conventional and Nuclear Plants and Components

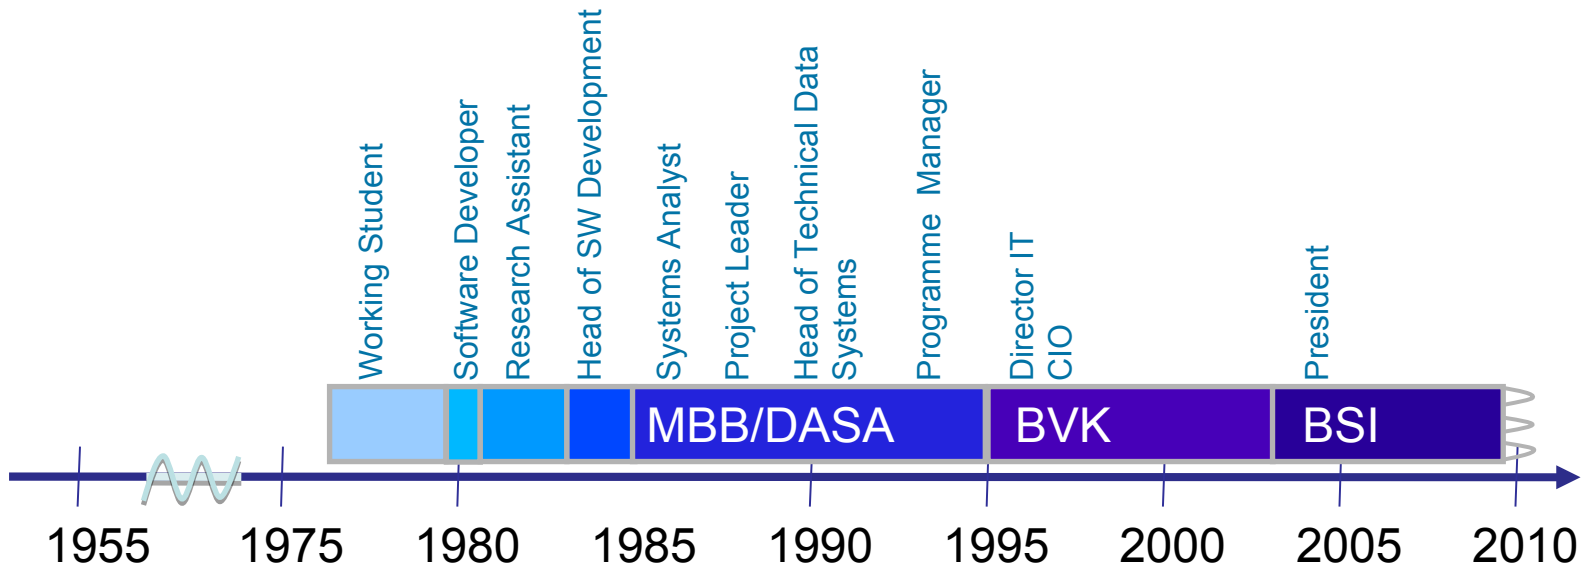

Aviation, Defence and Space Industry

Public Insurance Business

Information Security

Motivation

Working on
the European level

The Union as a whole
is more than the sum
of its Members !

In a global information society, new
technology entails new risks ...

... which need European and
international cooperation.

- ▶ **Contributing to a secure information society
in Europe**

ENISA Vision

- ENISA is an established agency in Europe and beyond, accepted as a **centre of competence** and recognised by **all stakeholders** as a permanent communication platform and focal point of network and information security.
- The Agency's advice has a **lasting impact** on the Commission and Member States' decisions, regulations and laws.
- Businesses and organisations in the Member States **appreciate the Agency's services**.
- A **culture of network and information security** promotes the European internal market and offers EU citizens a **sense of security and trust** in the benefits of information and communications technologies.
- **Permanent Mandate for ENISA**

ENISA Mission

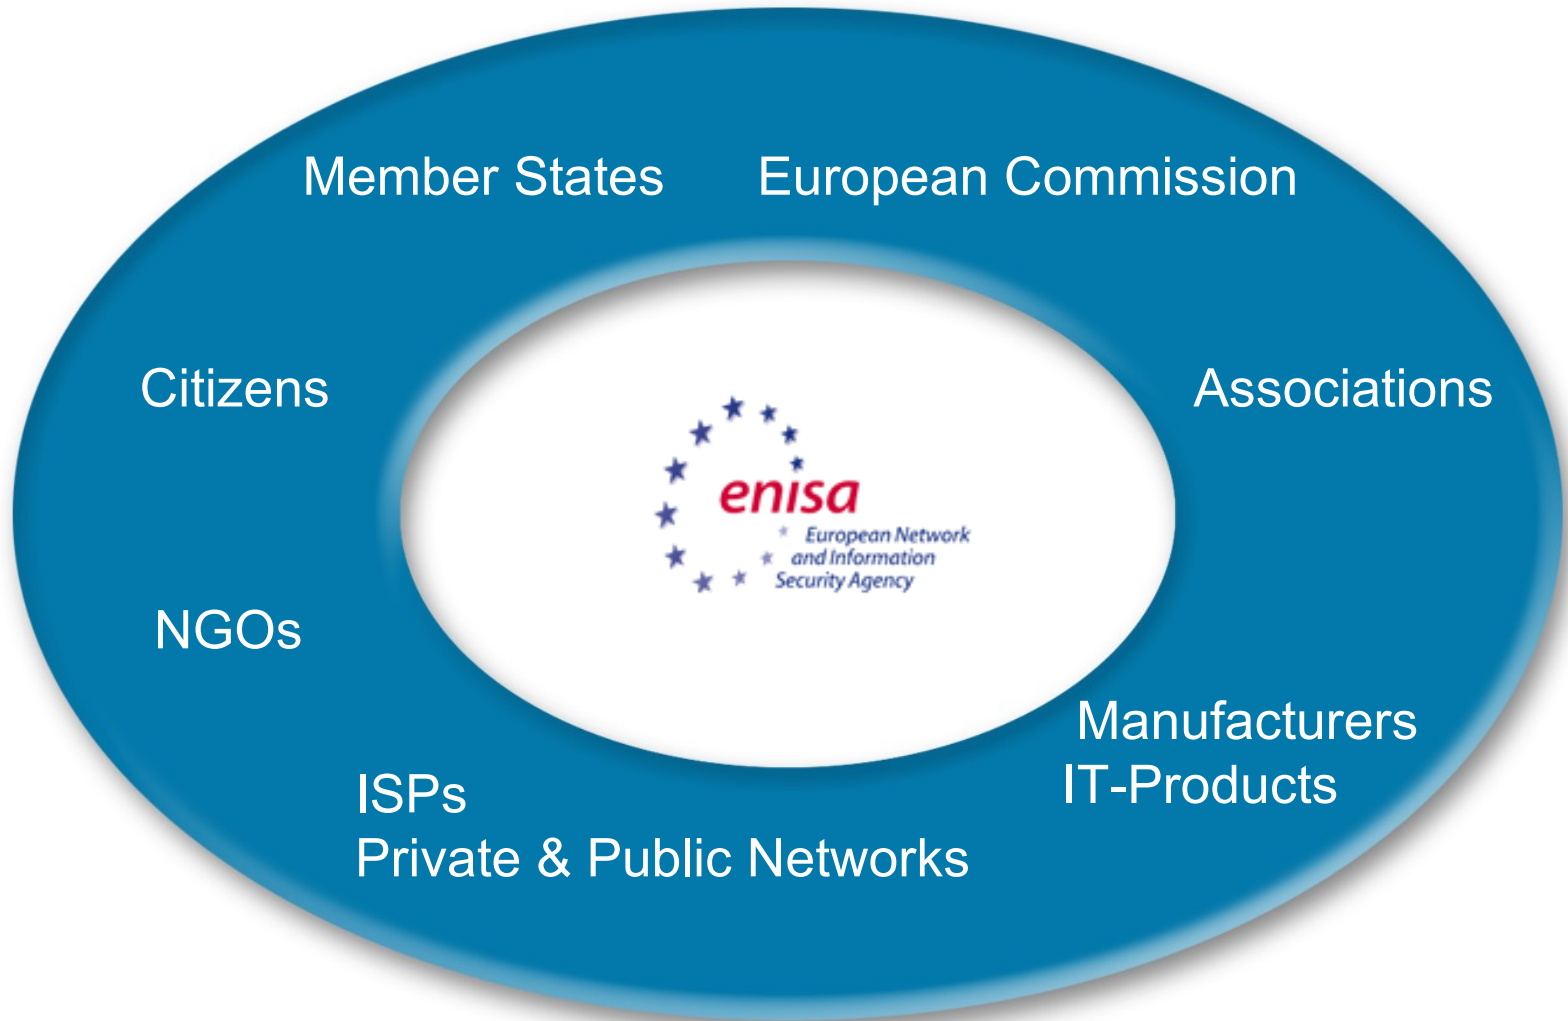

Securing Europe's Information Society

ENISA to become a pacemaker for
network and information security

ENISA until 2012

Networking

ENISA until 2012

Challenges of the ED

ENISA until 2012

Evolution of the Work Programme

- Strategic evolution:
 - Focusing on specific European objectives and tasks, i.e. those which the Member States cannot tackle appropriately on their own
- Thematic evolution:
 - Exemplary, additional fields to be considered: Internet of Things, Ambient Intelligence, Social Networks, Cloud Computing, European Service Directive, Cyber Security, ...
- Results:
 - Added value for EU and Member States

Summary

- **Securing Europe's Information Society**
- ENISA to become a pacemaker for network and information security
- ENISA to become a brand for trust and security
- Working towards a permanent mandate
