

The ENISA Strategy

Steve Purser

February 18, 2014

Changes Since the Last Version

- The amount of text has been greatly reduced so as to make the document more focused and easy to read.
- A section on the Threat Landscape has been introduced.
- **Strategic objectives** have been modified to reflect the discussion in the last Management Board meeting.
- Strategic objectives have been broken down into **core priorities**.
 - The core priorities are the same as the ‘key areas’ in previous versions of the strategy document.
 - Each core priority has been assigned to the relevant strategic objective.
- A mapping between the lessons learned from the Threat Landscape and the strategy has been presented.

The Strategic Objectives

- O1. To develop and maintain a high level of expertise of EU actors taking into account evolutions in Network & Information Security (NIS).
- O2. To assist the Member States and the Commission in enhancing capacity building throughout the EU.
- O3. To assist the Member States and the Commission in developing and implementing the policies necessary to meet the legal and regulatory requirements of Network and Information Security.
- O4. To enhance cooperation both between the Member States of the EU and between related NIS communities.

Strategic Objective 1

To develop and maintain a high level of expertise of EU actors taking into account evolutions in Network & Information Security (NIS).

- The core priorities are:
 - Global analysis of threats and opportunities in ICT
 - Security data collection & analysis
 - Assisting Member States in defining a framework for structured training

Strategic Objective 2

To assist the Member States and the Commission in enhancing capacity building throughout the EU.

- The core priorities are:
 - Improving the protection of Critical Information Infrastructure & Services
 - Supporting capacity building at national and EU level
 - Capability building for CERTs & other operational communities
 - Securing emerging technologies & business models

Strategic Objective 3

To assist the Member States and the Commission in developing and implementing the policies necessary to meet the legal and regulatory requirements of Network and Information Security.

- The core priorities are:
 - Providing objective input to support EU policy making
 - Supporting cyber security strategy implementation
 - Support for research & development in the area of NIS
 - Supporting Standardisation
 - Aligning NIS initiatives with privacy & data protection requirements

Strategic Objective 4

To enhance cooperation both between the Member States of the EU and between related NIS communities.

- The core priorities are:
 - Building NIS Communities for policy goals
 - Increasing the level of participation of the EU citizen
 - Building communities through exercises
 - International engagement

Improving Effectiveness & Efficiency

- Public Affairs & Outreach
- An approach based on multi-annual planning
- Improving operational effectiveness
 - Effectiveness & efficiency
 - Stakeholder driven work programme
 - Definition of streamlined processes
 - Effective quality control
 - Proactive financial management

Conclusions

	ENISA Strategic Objectives			
	O1: Develop and maintain high level of expertise in EU	O2: Assist MS and COM in enhancing capacity building	O3: Assist MS and COM in developing and implementing policies necessary to meet regulatory requirements	O4: Enhance cooperation between MS, EU and related NIS communities
Threat Landscape				
Better coordination and orchestration of activities	√	√	√	√
Cover all elements of the threat landscape	√	√		√
Building of cyber security intelligence based on available knowledge	√	√	√	√
Increase reaction speed	√	√	√	√
Educate users	√	√		
Increase robustness and resiliency of IT-Infrastructures		√		
Focus on emerging technology and application areas	√	√	√
