

Rijksinspectie Digitale Infrastructuur Ministerie van Economische Zaken en Klimaat

#### AI (Act) and standardization

**Dutch Authority for Digital Infrastructure** 

Ruud Kerssens RE RA CISA CRISC 25<sup>th</sup> May 2023

Standardization plays an important role in making objectives concrete

## **Dutch landscape**

Ministerie van Binnenlandse Zaken en Koninkrijksrelaties

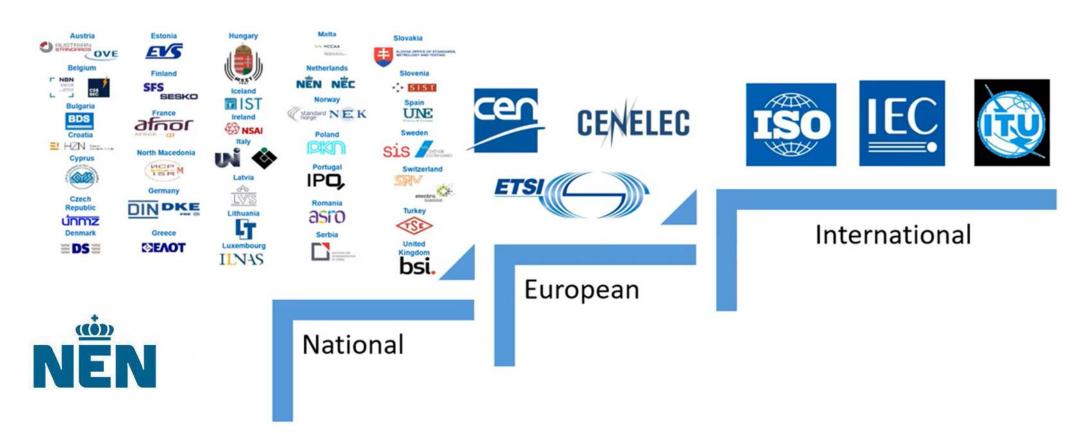

## Standardization landscape

## AI, standardization and RDI

- Collaboration of involved stakeholders AI;
  - NL Working group supervisory on AI and algorithms
  - EU Working group AI
- > Pilots!
- Standardization
  - NEN: AI Experts collaborate and participate in standardization
    ISO JTC1/SC42; CEN/CENELEC JTC21; Joint committees
  - Ministries are involved as well;
  - Additional group to join WG1 of JTC21 to address the standardization request of the EC;
  - Discussion on the content to find a National opinion;
- RDI is also involved in ETSI SAI and TC Cyber.

# Challenges – cybersecurity and AI

- Joint effort JTC21 with JTC13 Security and Privacy
- Information security versus cybersecurity
- Upcoming models (LLM like ChatGPT) and role of the foundational models
- New AI applications introduce new risks and new security
- > Challenges in dealing with horizontal standards and vertical standards
- Time constraints for (complex) development / Urgency to be issued given impact on society
- How to address conformity
- Linked to product legislation but includes services as well
- "Product" life cycle management challenge
