# Cybersecurity standardisation: Efforts needed to support the regulation

Charles Brookson

What do we need?

- Make the user understand what they have!
  - CE Mark, NCAP European Car Safety testing, Star Marking?
- A scheme
  - Common Criteria, Self regulation by Industry?
- How are the schemes approved?
  - List, Panel, Criteria?
- Who pays for it?
  - Manufacturer, Supplier, Customer?

Issues to think about

- Where should we start?
  - Organisation?
  - Who should control it?
- Lifetime
  - Every security system is broken in time!
  - Vulnerability disclosure.
  - Is there any legal liability?
- Implement!
