

# Cyber Security for Consumer IoT: Technical Specification (TS) 103 645

Presented by: **Jasper Pandza**  
**UK DCMS**  
**ETSI TC Cyber**

For: **ENISA conference on  
cybersecurity  
standardization,  
21 January 2019**

# Consumer IoT

- Estimated 12.9 billion consumer IoT devices by 2020 (Gartner 2017)
- Poorly secured IoT devices threaten people's privacy, online security and safety. They can be misused for large-scale DDoS attacks.
- ETSI TC Cyber approved Technical Specification (TS) 103 645 on 18 January 2019, with publication scheduled for February 2019.

# Content of TS 103 645

- 37 requirements and recommendations in 13 sections:
- With implementation pro forma
- Initial draft was based on UK Code of Practice for Consumer IoT Security

## Features of TS 103 645

---

- High-level** Offers flexibility as IoT technology develops. Provides space to implement security solutions appropriate to the product.
- Focused** Limited to provisions that matter most – does not attempt to solve all security challenges. Implementation is manageable.
- Scope** Applicable to all internet-connected consumer products. Not applicable to industrial applications (IIoT), healthcare, transport etc.
- Industry recognition** A major UK testing house is exploring TS 103 645 as a basis for certification. Some manufacturers have pledged implementation of UK Code of Practice.
