

Collaboration

in a CSP setting

- Step 1: Use MISPP

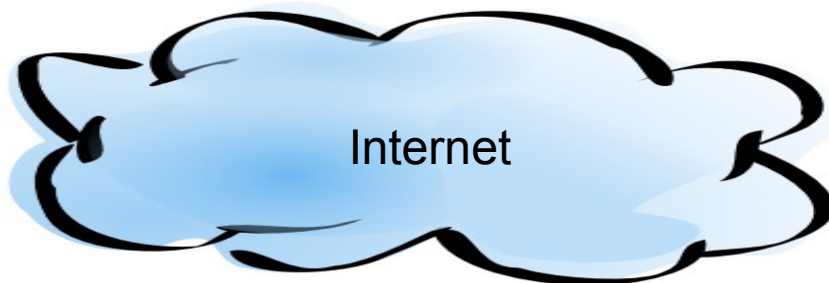

CSIRT
LCSPI

1b) Admin configures CSP-TM to sync with other LCSPI-TM instances based on trust circles, sharing groups, TLP codes, etc. (*cf. next slide*)

CSP-TM (MISP)

1a) Admin configures CSP-TM to automatically collect and pre-process feeds, tweets, data sources, vendor reports, ...
(*STIX/Cybox, CVE, ARF, CSV, PDF, email, ...*)

2) Team member „uses“ CSP-TM: search, create, delete, enrich, get, export, review, update ThreatData
3) Team member receives notifications from CSP-TM about threats, acts accordingly

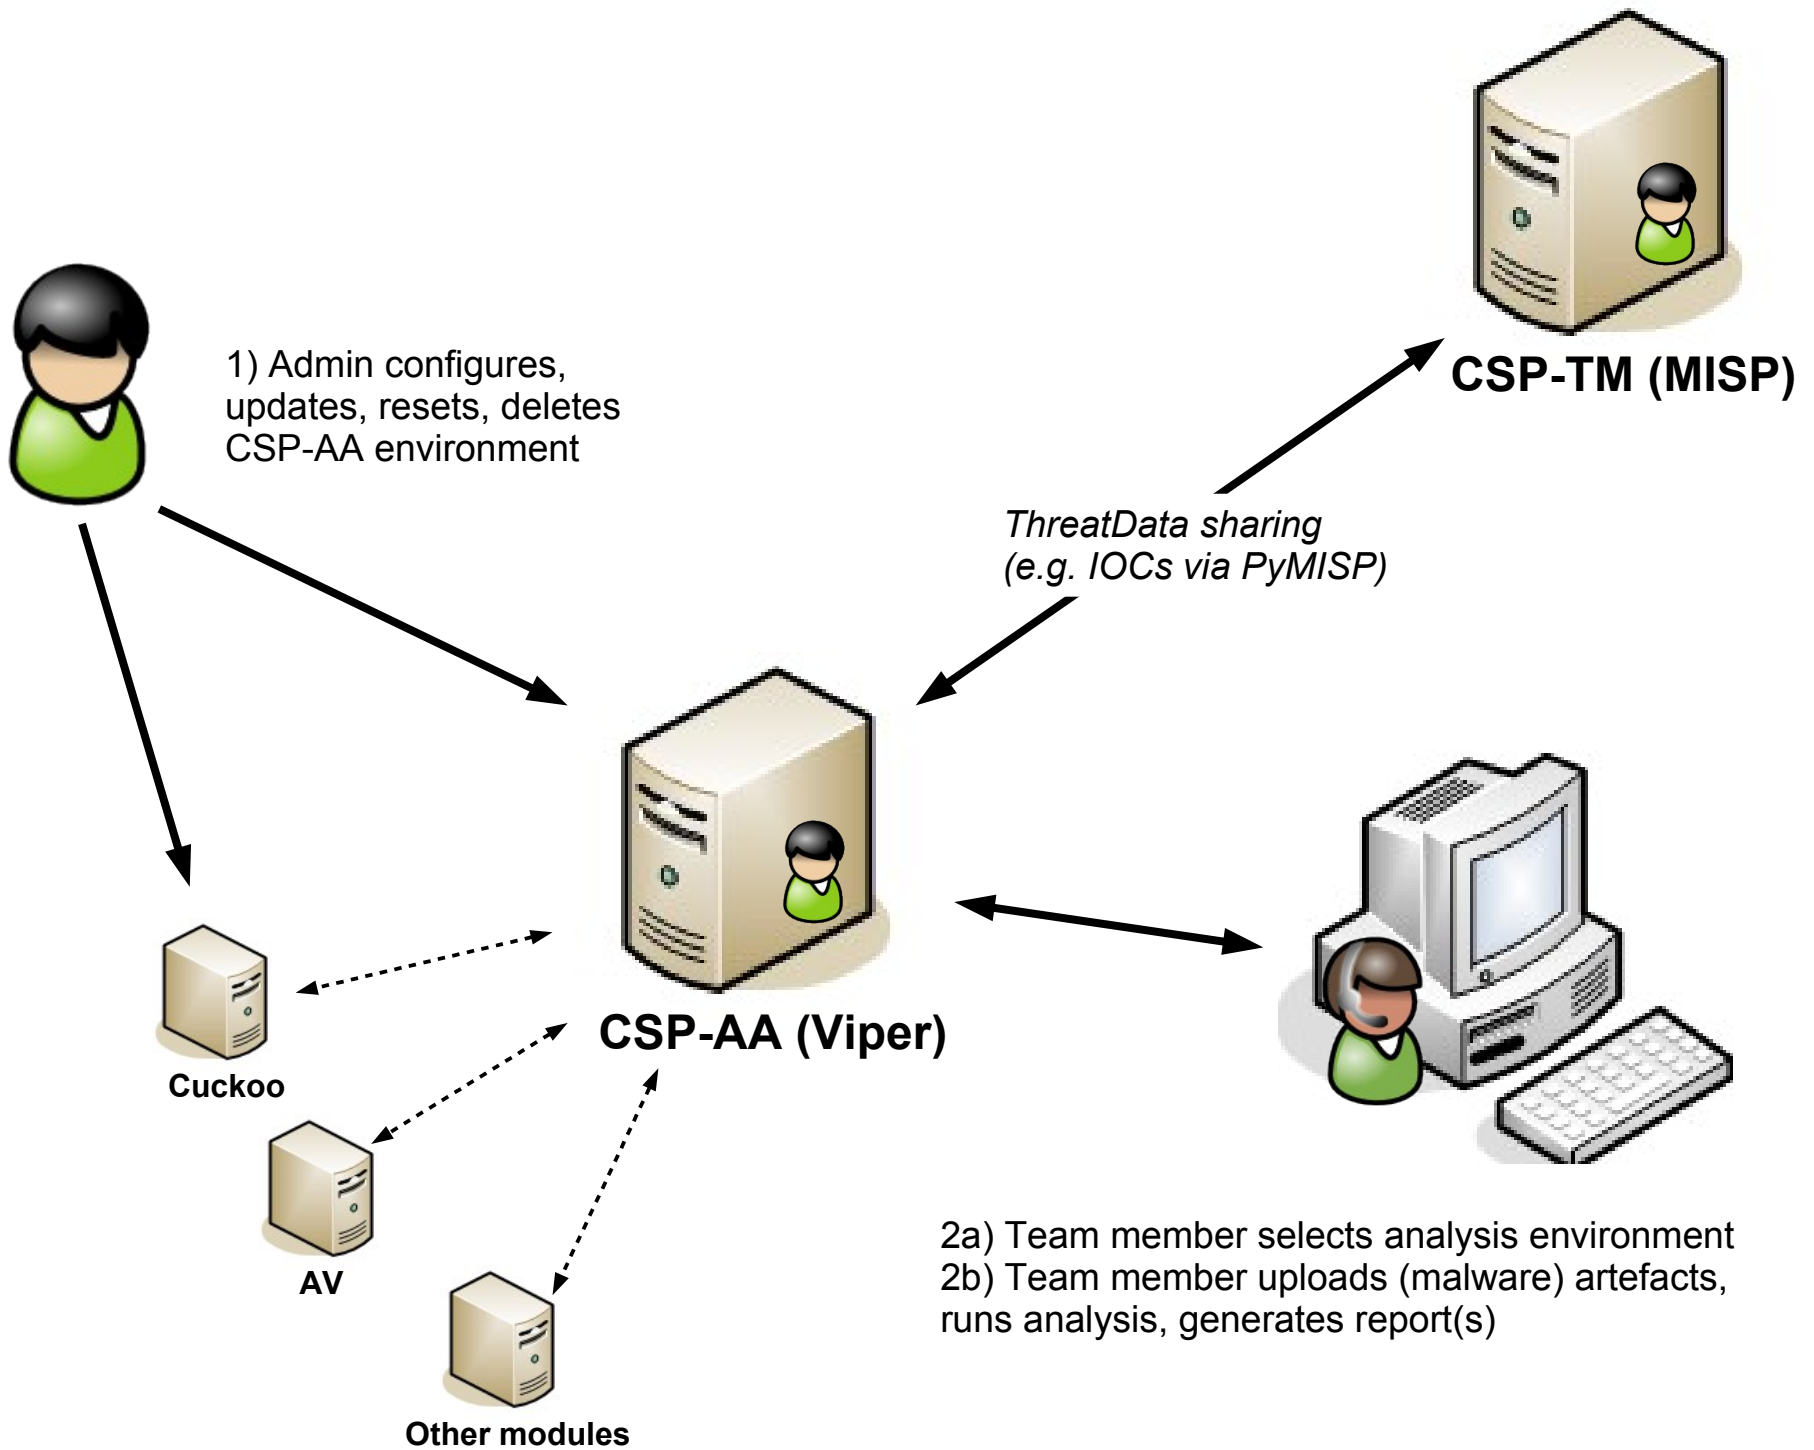

Collaboration

in a CSP setting

– Step 2: Use VIPER

in addition for managing

Artefact Analysis

Collaboration
in a CSP setting
– Step 3: Use
Secure Communication
to collaborate
