The National Cyber Security Strategy (NCSS)

Strength through cooperation

NCSS: goal and principles

- Sent to parliament on February 2011.
- Goal
 - Security and trust in an open and free digital society
- Basic principles (to be successful)
 - Public Private Partnership as doctrine
 - Cooperation:
 - > National
 - > International

NCSS: 6 lines of action

- Setting up CS Council and National CS Centre
- Setting up CS Threat Assessment
- Increasing the resilience of critical infrastructure
- Increasing response capacity on attacks/disruptions
- Intensifying investigation and prosecution of cybercrime
- Encouraging research and education

National Cyber Security Council

- Independent advisory body for the Cabinet
- Monitoring National Cyber Security Strategy
- Government, Private sector, Science
- On CEO/CIO level
- Funding by government

The Cyber Security Threat Assessment

- Analysis of threats in ICT domain
- For Government, Parliament and Cyber Security Council
- No recommendations
- Two versions: public & confidential
- Yearly, with Public and Private input

Nationaal Cyber Security Centrum
Ministerie van Veiligheid en Justitie

National Cyber Security Center

Concluding thoughts

- The NCSS is about increasing trust, knowledge en awareness
- Current focus on concrete actions. The next strategy must include more strategic vision.
- More focus on the international dimension
- About writing an NCSS:
 - Involve all relevant parties, but make one party responsible.
 - Organise a high level steering committee

Challenges

- Cyber Security as winning business concept: game changer?
- Cyber Security governance model: clear roles and responsibilities for all parties.
- Having an integrated vision on the concept of security versus a free and open cyber space
