eIDAS: What is it about?

Supporting businesses!

TRUST

CONVENIENCE

CROSS-BORDER

SEAMLESS
eIDAS: Opportunities for e-services

- **Facilitate on-line seamless consumer experience** without face-to-face verification
- **Easier access** to distance credit for consumers; **EU cross-border market** for banks
- **Trusted credentials** ease discharging **regulatory requirements** (e.g. Anti-Money Laundering)
- **Verified identities** to check credit rating and contact with public administrations (tax agencies)
- **Lower risk & more convenience by** relying on e-ID, e-sign, e-seal, e-registered
- ...
17.09.2014 - Entry into force of the Regulation

18.09.2015 - Voluntary recognition eIDs

1.07.2016 - Date of application of rules for trust services

18.09.2018 - Mandatory recognition of eIDs
Planning of Implementing Acts:

- **Commission Implementing Decision (EU) 2015/296 of 24.02.2015**
  - Procedural arrangements for MS cooperation on eID (art. 12.7)

- **Commission Implementing Regulation (EU) 2015/806 of 22.05.2015**
  - Form of the EU Trust Mark for Qualified Trust Services (art. 23.3)

- **By 18.09.2015 (opinion by the eIDAS Committee on 23-24.06.2015)**
  - Interoperability framework for eID (art. 12.8)
  - eID levels of assurance (art. 8.3)
  - Trusted lists for QTSP (art. 22.5)
  - Formats of eSignatures (art. 27.4) & Formats of eSeals (art. 37.4)

- **Additional IAs** may also be adopted when appropriate (e.g. circumstances formats and procedures for the notification of eID - art. 9.5)
The EU Trust Mark for Qualified Trust Services – winner of "e-Mark U Trust" Competition

Other secondary legislation

Adoption of additional secondary legislation would take into account considerations related to:

- **Legal certainty**
- **Market needs**
- **Availability of standards** (or **Technical specifications**)
- Compatibility of standards (or Technical specifications) with requirements set in the Regulation
- Actions of the European Cooperation for Accreditation under Regulation 765/2008/EC
- Outcomes of non-regulatory approach (i.e. ENISA's activity on art 19)

ENISA
Stakeholder engagement activities

- **eIDAS stakeholder engagement plan** -> an enabler of DSM
  - **Key sectors**: Financial & Banking Services, Sharing economy, eCommerce, Transport, Mobile Operators, Social Innovators
  - Setting-up of an **eIDAS European Observatory** on online trust, security and transparency
  - Launching a series of **high-level roundtables** with private sector to define strategic recommendations to foster the use of eID and trust services as enablers of market digitisation (DSM)
  - Setting-up a **cross-DG eIDAS interest group** to discuss existing and planned legislative proposals to benefit from the transformative role of eID and trust services (under eIDAS)
eIDAS – few key messages from private sector

• There is increasing **business demand** for trust, security and **convenience** in online transactions

• **Seamless user experience and usability** cross-sector and cross-border

• **Reliability, simplicity and security** - deciding factors in uptake-> mobile environment/diversity of credentials

• Public sector should **lead by example**

• **Smartphones and mobile devices** are central to everyday life

• Need for European **interoperability** supported by some **standards**-> federating eID & global dimension

• Govs and private sector need **business model** for provisioning and consuming eID means

• Cross-sector & cross-border use of eID calls for more **regulatory alignment**

• ...

Signature Creation & Validation

1. Signature Creation / Validation Protection Profiles
   - Certificate Authority
   - Time-stamping
   - Signing Servers
   - Validation Services
   - Rules & procedures
   - Formats
   - Signature Creation / Validation Protection Profiles

2. Signature CreationDevices
   - Common Criteria Protection profiles
   - Smart Cards
   - HSMs
   - Signing services

3. Cryptographic Suites
   - Key generation
   - Hash functions
   - Signature algorithms
   - Key lengths
   - ...

4. TSPs supporting eSignature
   - TSPs supporting eSignature

5. Trust Application Service Providers
   - List of TSP services approved (supervised) by National Bodies (e.g. Trusted Lists)

6. Trusted Lists Providers
   - XAdES (XML)
   - CAdES (CMS)
   - PAdES (PDF)
   - AdES in Mobile envmts
   - ASiC (containers)

ENISA Support for eIDAS

- **ENISA** (European Agency for Network and Information Security):
  - 2012 → [Report on the implementing eIDAS art. 15](#)
  - 2013 → [Guidelines for Trust Service Providers](#)
  - 2014
    - Common audit schemes for trust services providers in MS.
    - Technical guidelines for independent auditing bodies and supervisory authorities
  - 2015 focus on:
    - Technical guidelines for Implementation of Art 19
    - ENISA Forum for trust service' stakeholders (1st meeting 30/6/15)
    - Evaluation of standards
    - Introduction of qualified website authentication certificates
    - Awareness raising - European Cyber Security Month (Oct 2015)
Digital service infrastructures (DSIs) for cross-border delivery of services to citizens, businesses and public administrations

**CEF Digital**

- eID
- eInvoicing
- eSignature
- eDelivery
- Automated Translation

1st priority

- eProcurement
- Business mobility
- ODR
- Business Registers
- eHealth
- etc

... and more to come

eIDAS in Horizon 2020 - DS-05-2015 – Trust eServices (1/2)

**Planned Opening Date:** 25-03-2015

**Publication date:** 11-12-2013

**Deadline Date:** 27-08-2015 17:00:00 (Brussels local time)

**Main Pillar:** Societal Challenges

- Proposals requesting a contribution from the EU of between 3m € and 8m € would allow this topic to be addressed appropriately.

**Expected impact:** The initiative should create the conditions for more commercial applications and services to integrate the use of e-signatures, timestamps, e-seals and certified electronic delivery
Specific challenge: Deployment of e-Services is hampered by the lack of globally interoperable solutions, mutually recognized or compatible trust models and the absence of solid business cases.

Scope: devise demonstrators for the automated comparison and interoperability of electronic trust services covering aspects such as security assurance levels or liability of trust service providers:

- differential assessment of technical and organisational standards for trust services, as well as the development of a framework for 'global trust lists'.

- Validation platforms able to handle the specificities of various jurisdictional or national systems could be created.
