WHAT ARE THE CHALLENGES?

QUICK SUMMARY FOR DEBATE

- + Create global solutions
 - EU rather tries to state how global solutions should change to fit EU and that cannot be a winning strategy
- + Create at least EU wide solutions
 - We regulate each other out on the local markets, if not successful in EU level, then we do it on MS level with almost no consequences
- + Appreciate capitalism and competition
 - Try to win instead of assuring not to lose
- + Regulate if there is no alternative!
