EU sees eIDAS regulation come into full force

A regulation aimed at cutting red tape to enable a digital single market in Europe will soon be in full force, but it could present some challenges to the UK after Brexit

Warwick Ashford Security Editor 28 Sep 2018 10:45

From 29 September 2018, all EU countries will be obliged to recognise national systems that are already notified and comply with the **electronic identification, authentication and trust services (eIDAS)**
