A standardized approach to Trust Service interoperability

ENISA 5th Trust Services Forum | Berlin | September 25, 2019

Andrea Valle | President

CLOUD SIGNATURE CONSORTIUM

CLOUD SIGNATURE CONSORTIUM

Building a standard for cloud signatures

A new industry consortium to pioneer
open digital signatures for mobile and the web

#OpenSignature

Meet the Cloud Signature Consortium

- The **Cloud Signature Consortium** is an international non-profit association among Solution, Technology and Trust Service Providers

  - Promote cloud-based Digital Trust Services.

  - Design a common architecture and building blocks to facilitate trust service interoperability

  - Develop technical specifications about protocols and API for trust service

  - Publish technical specifications as open standards.

Secure transactions, on the go

Cloud storage, no download

Simple certificate ownership

Easy deployment for end users

The CSC Members

Topics for today

1. (Global) Trust Service interoperability.

2. Acceptance and Quality of online Identity Proofing.

3. Evolution of cloud-based Trust Services.
