

EUDI Wallet Development in Poland

From national digital identity solutions to trusted
European digital services.

Monika Małowiecka · Ministry of Digital Affairs, Poland
Trust Services Forum · Tallinn · September 2026

Building on a strong foundation.

mObywatel

mObywatel provides a strong foundation for Poland's EUDI Wallet combining scale, user trust and implementation experience.

Established digital identity ecosystem
mObywatel as a gateway to digital public services
Experience in delivering services at scale
Active participation in European pilots

mObywatel's experience as the foundation of the Polish EUDI Wallet

One ecosystem. Two complementary dimensions.

NATIONAL

- Existing public services
- National digital documents
- Familiar user journeys

EUROPEAN

- Cross-border services
- Electronic attestations of attributes
- User-controlled data sharing
- EU-wide interoperability

EUDI Wallet extends the Polish
digital identity ecosystem.

Current state of play

CURRENT STATE OF PLAY

Poland is advancing EUDI Wallet through parallel work on regulation, product, trust and ecosystem readiness.

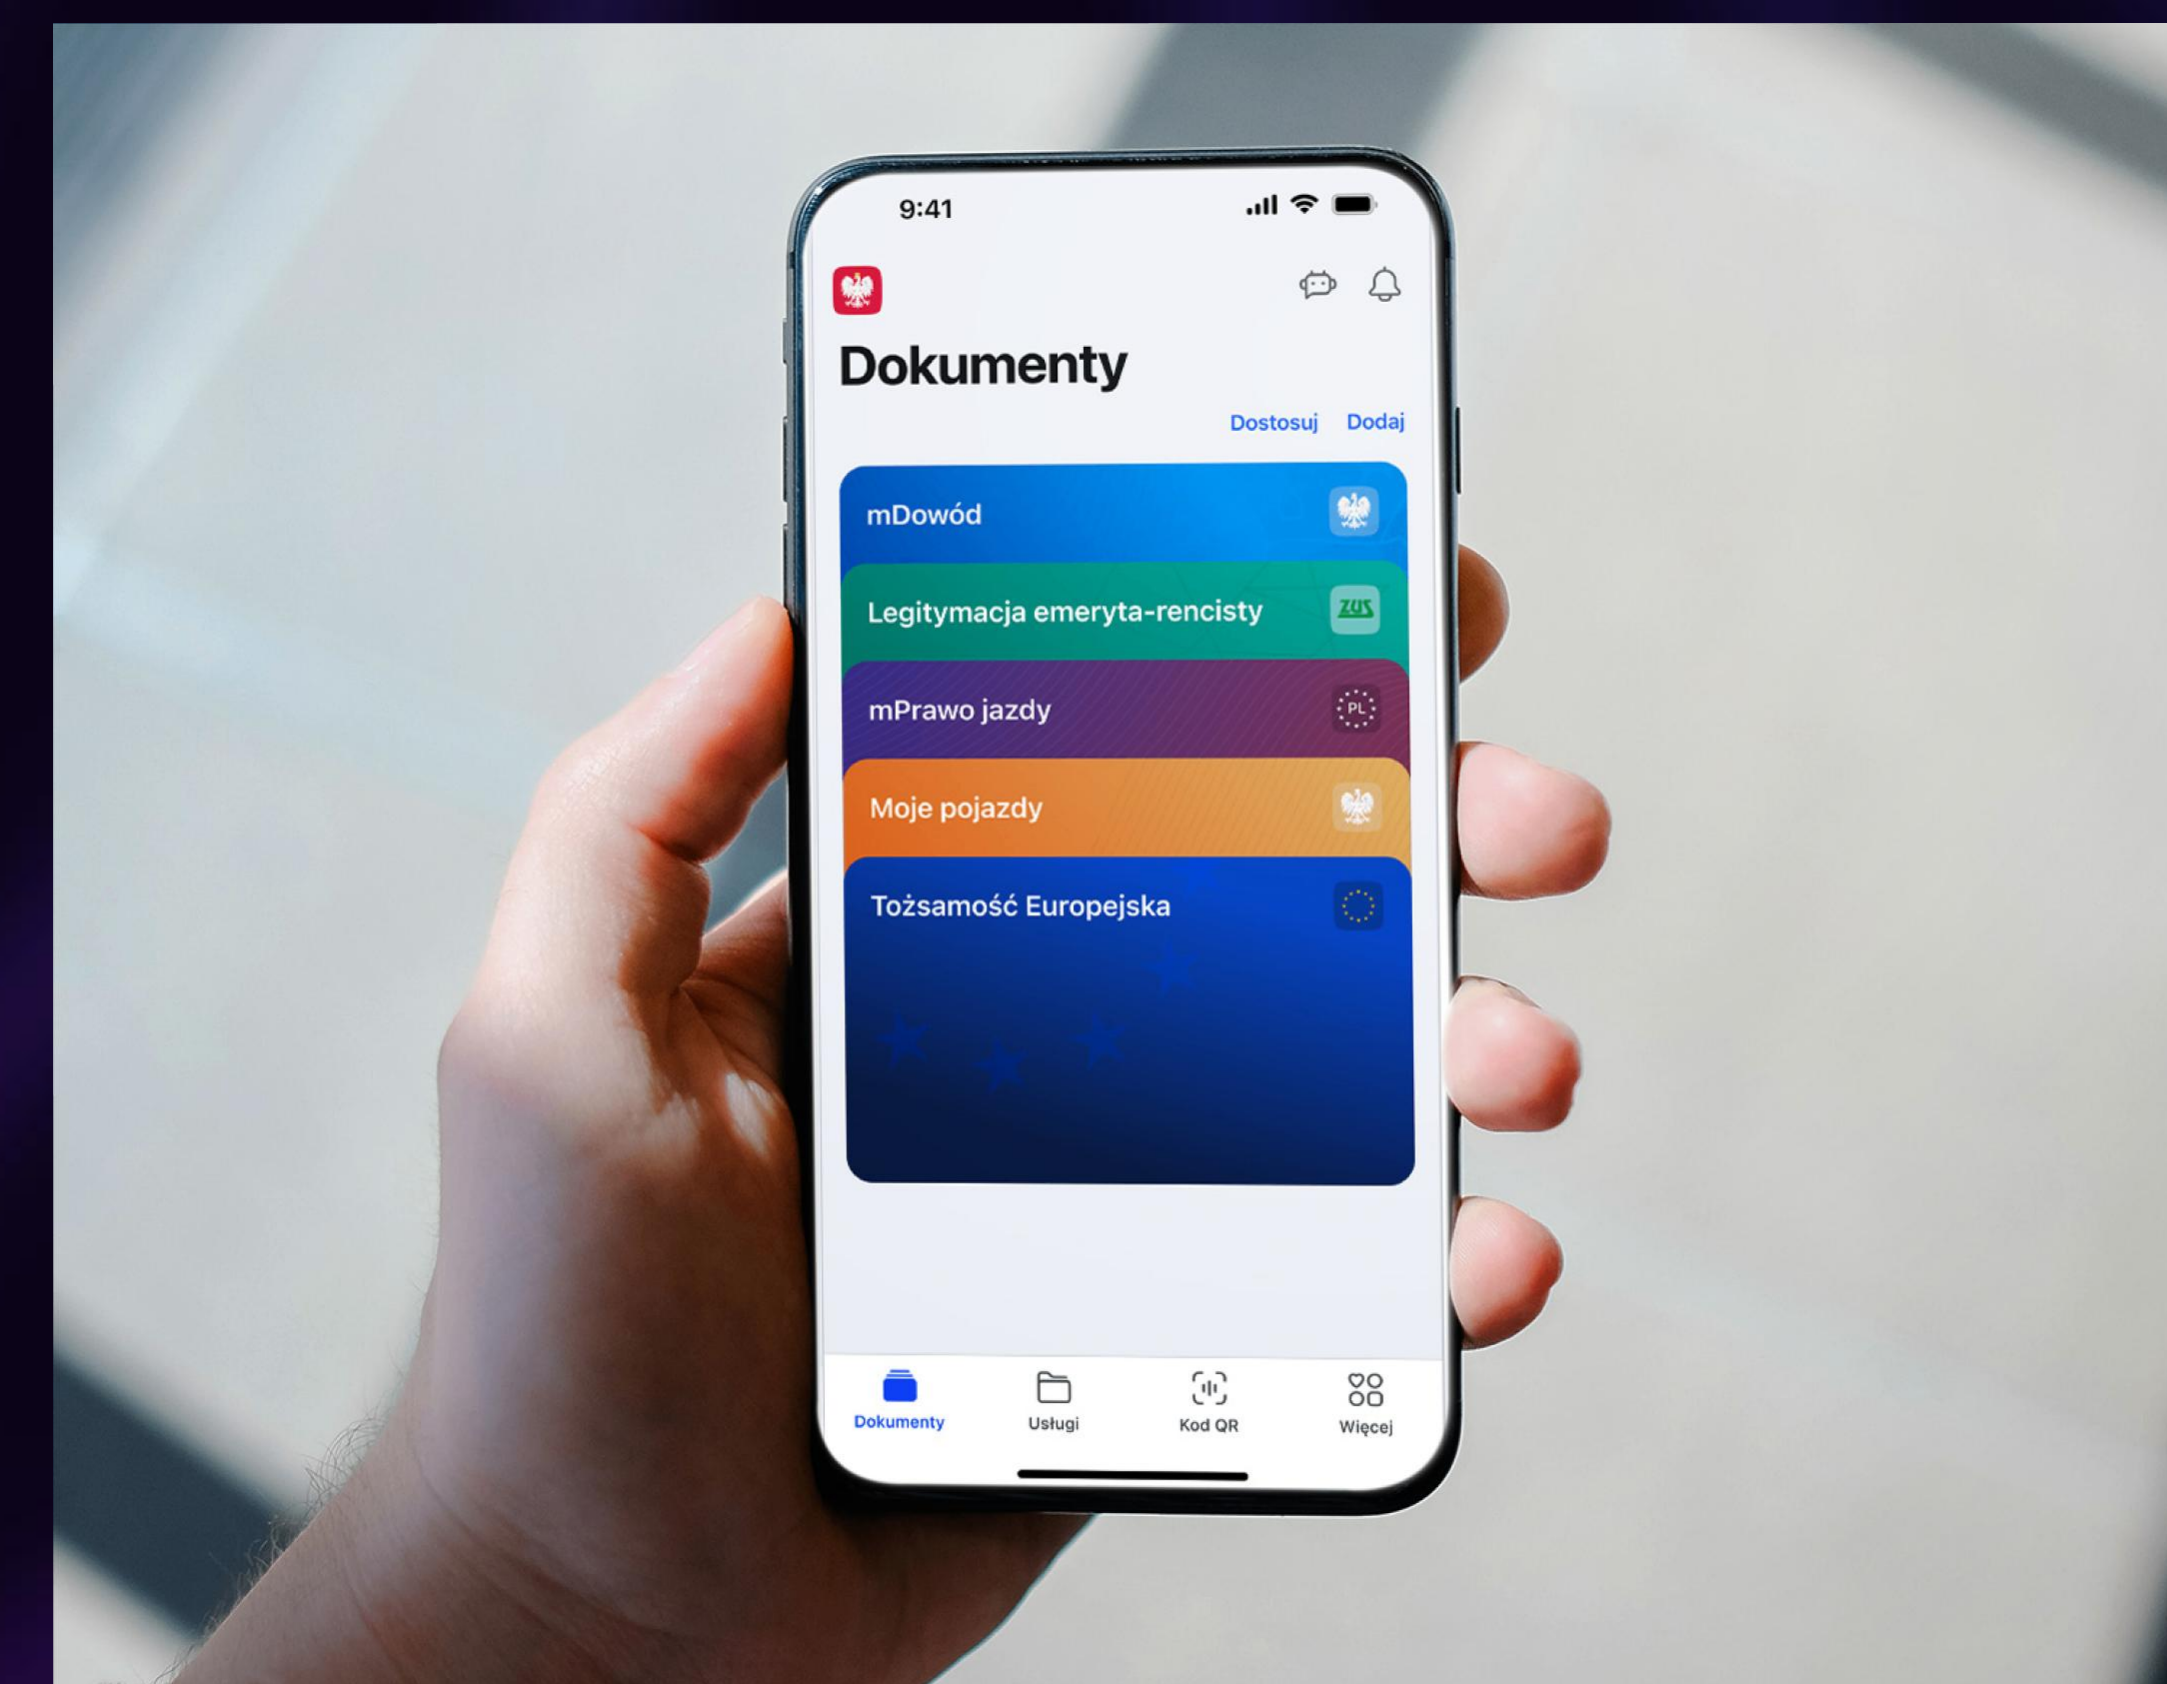

PARALLEL TRACKS

- Relying party ecosystem preparation
- Cooperation with the market (Sandbox and APTITUDE)
- Participation in LSP APTITUDE

CORE WORKSTREAMS

- Development of the national legal framework
- Wallet design and development in progress
- Preparation of attribute and identity mechanisms

Preparing the legal, technical and operational foundations.

Sandbox and Pilot Ecosystem

INTEROPERABILITY IN PRACTICE

COOPERATE

Work with businesses and public institutions.

ONBOARD

Prepare service providers for integration.

TEST

Enable potential cross-border testing and exchange of experience.

WHAT IT SHOULD DELIVER

- validation of use cases
- technical readiness
- operational readiness
- learning through pilots

Preparing to test together with the market.

Certification as a foundation of trust

National certification programme prepared by the Ministry of Digital Affairs, National Institute of Telecommunications- State Research Institute.

Development of a certification framework ensuring compliance with European and national requirements for the EUDI Wallet ecosystem.

Trust starts before launch and must follow European and national requirements.

The road ahead

NOW / NEXT / THEN

NOW / in preparation

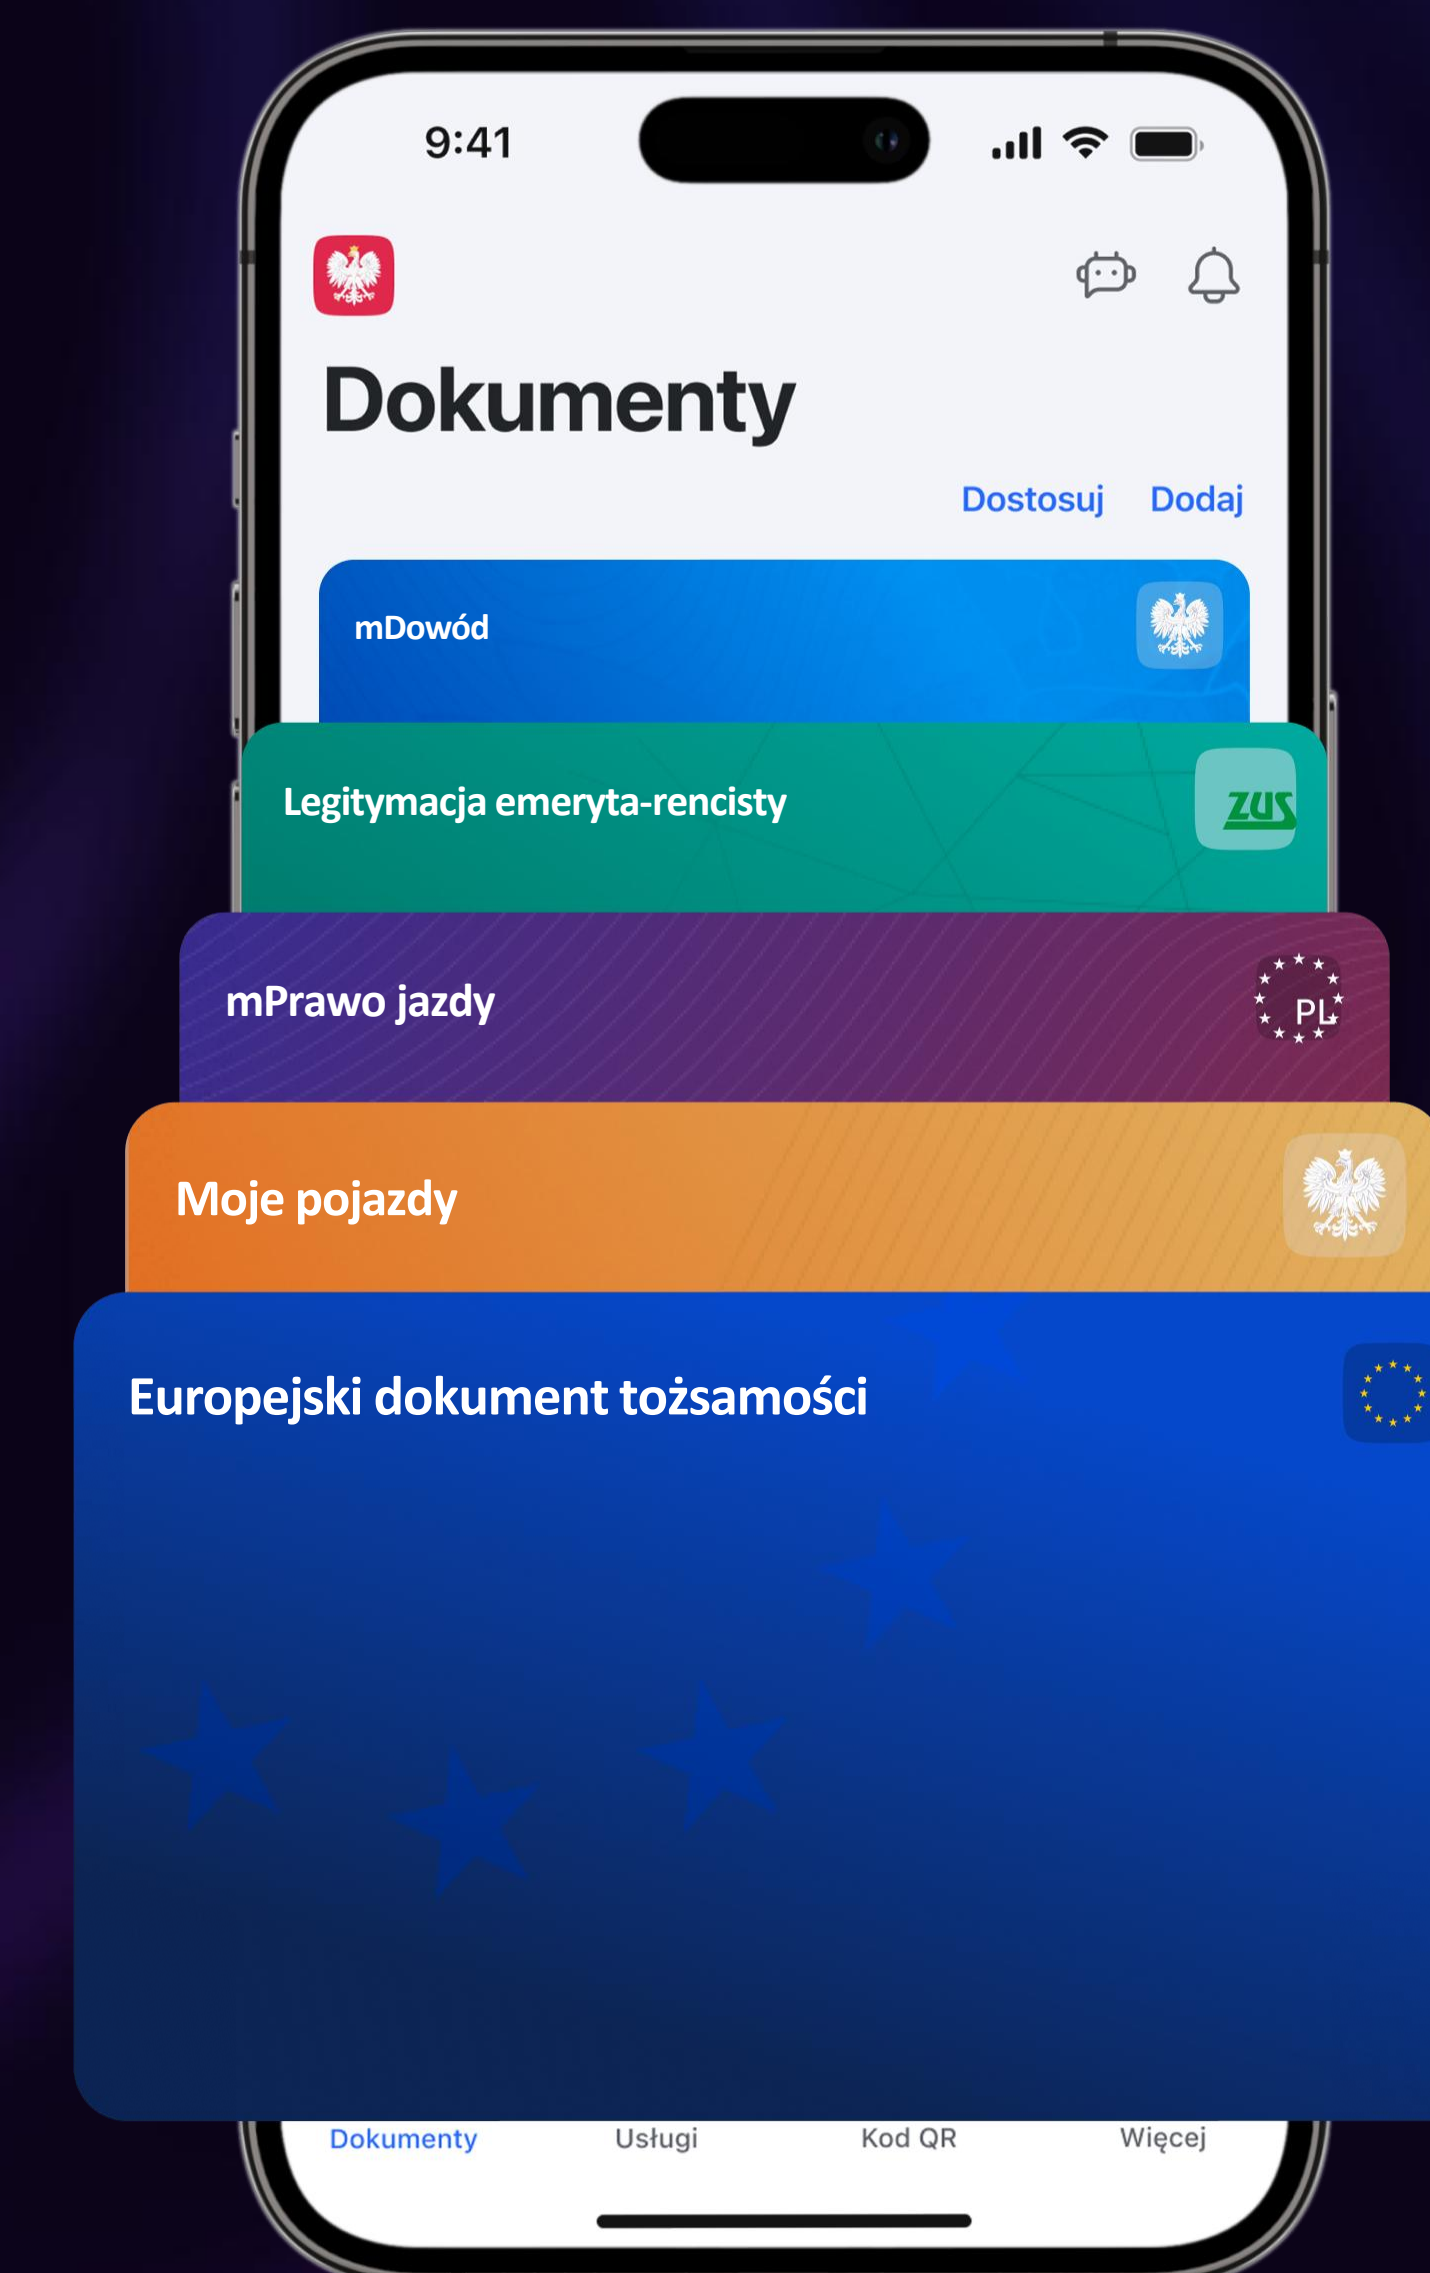

- Legal preparation
- Wallet development
- Certification framework
- Ecosystem readiness

NEXT / planned

- Sandbox EPTC
- Pilot EPTC launch
- User testing
- Service onboarding

THEN / subject to further development

- Cross-border services
- Additional attributes
- Ecosystem scaling
- Continuous improvement

Preparing to test together with the market.
