

ES EUDI Wallet National Certification Scheme

Ministry of Digital Transformation and Civil Service

September 2026. Tallinn. Estonia

ES EUDI Wallet National Certification Scheme (I)

- ✓ Establishes the framework, principles, requirements and conditions for the assessment and certification of ICT products, services and information systems involved in the EUDI Wallet ecosystem.
- ✓ **SCHEME OWNER:** National Cybersecurity Certification Authority (Spain's National Cryptologic Centre, CCN)
- ✓ Presented to ENISA and MS in April 2026

TWO CONFORMITY ASSESSMENT DIMENSIONS

- ✓ **FUNCTIONAL** Conformity Assessment
- ✓ **CYBERSECURITY** Conformity Assessment

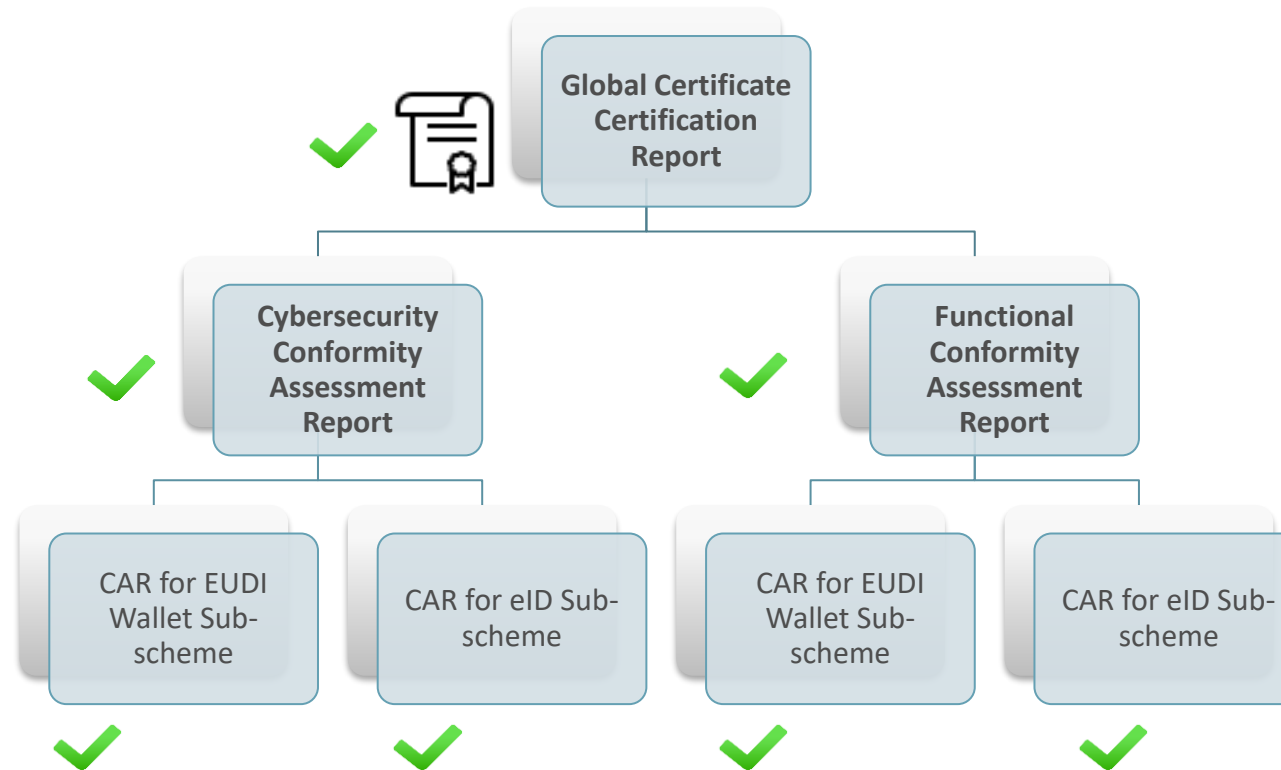

() Data protection compliance falls outside the scope of both the Functional and Cybersecurity certification assessments and should be granted through procedures under the responsibility of the National Data Protection Supervisory Authority.*

KEY OBJECTIVES

- ✓ Ensure a high level of security, trust and interoperability.
- ✓ Verify compliance with consistent technical and organizational requirements across the ecosystem.
- ✓ Define the roles and responsibilities of conformity assessment bodies, certificate holders and national competent authorities.
- ✓ Support cross-border interoperability and recognition throughout the European Union.
- ✓ Align certification activities with the requirements of the Cybersecurity Act, eIDAS 2.0, and the Implementing Regulation on EUDI Wallet certification.

ES EUDI Wallet National Certification Scheme (II)

One Global Certificate

ES EUDI Wallet National Certification Scheme: Current Status and next Steps

Where are we today

Cybersecurity Certification Scheme

- ✓ Structured risk-based certification framework
- ✓ Different sub-schemes (Wallet, PID)
- ✓ Based on existing certifications ("primary certifications"), declarations of conformity and supporting evidence
- ✓ Enables Wallet Providers and other relevant actors to start preparing evidence and obtaining primary certifications

Functional Certification Scheme

- ✓ Being developed at EU level
- ✓ National scheme definition dependent on the FCAF (Functional Conformity Assessment Framework)

Next steps

- ✓ Stable cybersecurity certification scheme published
- ✓ CAB accreditation by NAB (ENAC)
- ✓ Functional Certification Scheme development
