

ENISA TS & eID Forum 2026

Session 4

Future of Trust Services – Industry Perspective

Clemens Wanko & Boryana Uri

TÜV Austria @ ACAB'c

TSP and EUDI Wallet conformity assessment regimes compared

Trust Service since 2016

(e.g. mgmt. on behalf / remote sign, seal)

TS Processes & Procedures

QSCD

CAB acc. to ISO17065

EUDI Wallet new with eIDAS2

Wallet Solution Processes & Procedures

Wallet Secure Crypto Device

CAB acc. to ISO17065

SAME
for TS and Wallet

DIFFERENT
for TS and Wallet

EU-wide unified setup

One single Certification Scheme by CAB based upon ISO27065, ETSI EN 319403-1 and CAB specifics to be adapted by CAB and their accreditation

~ 27 x MS specific individual schemes

~ 27 **Certification schemes** based on ENISA frame, but individual to MS ideas to be adapted by CAB and their accreditation

EU-wide unified setup

One single Certification Scheme by CAB based upon ISO27065, ETSI EN 319403-1 and CAB specifics to be adapted by CAB and their accreditation

~ 27 x MS specific individual schemes

~ 27 Certification schemes based on ENISA frame, but individual to MS to be adapted by CAB and their accreditation

Let's harmonize this to an EU-wide unified regime!

What's auditable today and what is not?

How the certification and supervision framework behaves in practice

Assessment and certification prerequisites:

1. Criteria ready and scope clearly defined
2. Solution implemented and documented following the criteria as of #1 above
3. CAB skilled and accepted for assessments and in sync with formal accreditation

Typical issues preventing timely and successful assessment and certification:

1. Scope unclear: what kind of certification do we actually need?
2. Solution half implemented not fully documented
3. CAB required to formally evidence accreditation with any legal/normative requirements possibly touched in the project

Accredited Conformity Assessment Body: **eIDAS eID – EUDIW – Trust Services**
