ENISA requires the provision of specialised services on the subject of botnets, including stocktaking, analysis, good practices and recommendations. The services required have been presented as 2 lots, with the specific requirements for each lot as follows:

a) Lot 1 — botnet measurement techniques:

The objective of this lot is to take stock of the techniques used for measuring the extent of botnets and their activities (i.e. the number and nature of infections) and to provide guidance on the best available measurement techniques and the limitations of techniques in use.

Lot 1 is organised into 3 tasks:

task 1 — stocktaking;

task 2 — analysis, good practices and recommendations;

task 3 — project management.

b) Lot 2 — detecting, disinfecting and defending against botnets:

The objective of this lot is to take stock of and analyse policies, measures and methods to detect, disinfect and neutralise botnets. The analysis will enable the development of good practices and issuing of recommendations for all relevant stakeholders.

Lot 2 is organised into 3 tasks:

task 1 — identify stakeholders, stocktaking;

task 2 — analysis, good practice development and recommendations;

task 3 — project management.
