

OPEN CALL FOR TENDERS

*Concluding with: **Multiple Framework contracts with ‘re-opening of competition’***

General Introduction to Tender

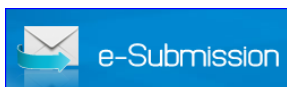

Development & Support of Infrastructure & Services related to EU Cyber Crisis Cooperation (3 LOTS)

ENISA F-COD-20-T03

LOT 1: “Development of Material for Exercises, Challenges and Trainings”

LOT 2: “Provision of infrastructure for Operational Cooperation and exercises”

**LOT 3: “Audio-visual material development, Journalistic, Public Affairs and
Back Office Support”**

*Offers via e-Submission portal **ONLY***

I. SCOPE OF THIS TENDER

The purpose of this Call for Tenders is to provide support for ENISA's work on *“Development & support of infrastructure & services related to EU Cyber Crisis Cooperation”* for the next three years.

The overall services to be provided have been split into three main themes (LOTS):

LOT 1: “Development of Material for Exercises, Challenges and Trainings”

LOT 2: “Provision of infrastructure for Operational Cooperation and exercises”

LOT 3: “Audio-visual material development, Journalistic, Public Affairs and Back Office Support”

For **each LOT**, ENISA seeks to contract the services of a minimum of three (3) service providers, which can provide the required support services.

Interested economic operators may choose to submit bids for one, two or all three LOTS, depending on their ability to provide the specific services requested in each LOT.

As each LOT includes a wide range of requested services, intending tenderers are encouraged to form consortiums or use subcontractors in order to meet the minimum requirements.

PLEASE NOTE: Although part of the same tender procedure, tenderers intending to bid for more than one LOT must submit entirely separate technical and financial offers for each LOT, using the appropriate folders clearly marked on the eSubmission platform.

II. PROVISION OF SERVICES - RE-OPENING OF COMPETITION

At the conclusion of this tender procedure, **at least 3 contractors for EACH LOT** will be awarded framework contracts. These contractors will then be eligible to bid for specific future projects based on the ‘Re-opening of Competition’ procedure, which is explained below:

ENISA launches a ‘Request for Proposals’ (RfP) for a specific project to each of the contractors awarded a framework contract for the particular LOT. The proposal shall only consist of a technical offer and financial offer and will not require the re-submission any administrative paperwork or proof of economic capacity and stability.

TIMETABLE FOR TENDER PROCEDURE

The timetable for this **3 LOT tender** and the resulting contracts is as follows:

Title: “**Development & support of infrastructure & services related to EU Cyber Crisis Cooperation**”

ENISA F-COD-20-T03
