

# Cyber Security Act 2 (CSA2) Proposal: **the New ECCF**

CNECT 26 January 2026

# CSA2: Creating European cyber services ecosystem

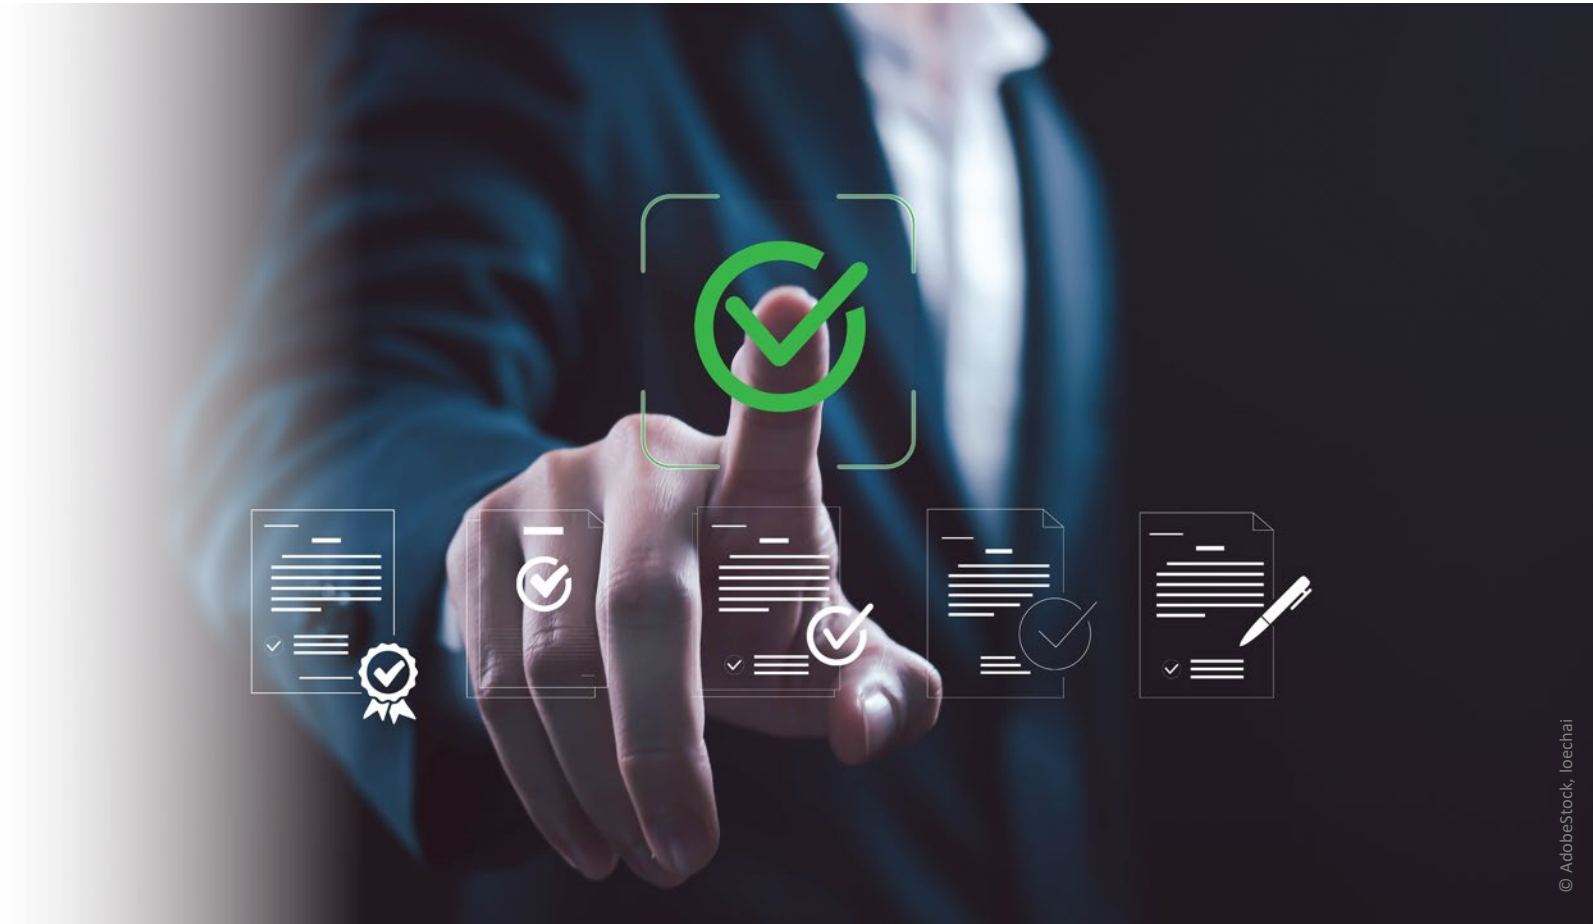

## Based on the following pillars:

1. Develop a framework for addressing the **ICT supply chain security challenges** in critical infrastructure.
2. Simplify and enhance the **European cybersecurity certification framework**.
3. Introduce **simplification measures** to reduce unnecessary administrative burden related to the implementation of the NIS2 Directive.
4. **Strengthened** European Union Agency for Cybersecurity (ENISA) to make it fit for purpose.

# European Cybersecurity Certification Framework

# Clarified and extended scope (1)

- Cybersecurity certification increases **trust and security** in the internal market and facilitating **compliance**.
- Certification ICT product, services, processes and managed security services or **cyber posture**
- Addressing **Technical risk factors**
- **High-risk suppliers and their key ICT assets** excluded from certification

# Certification as Compliance Tool (2)

## Certification

- updated and **fully synergised** with existing Union law  
(alignment with the CRA)
- as a **simplification tool** to demonstrate compliance with CRA & NIS2 and potentially other legal acts  
(organisation cyber posture scheme to enable simplified compliance)
- harmonised across schemes through **model provisions**  
(user-friendly reference provisions to harmonise templates across schemes)

# Efficient procedure and effective governance (3)

Member States

## The scheme "*owner*"

- Oversight of the procedure and implementation
- Strategic planning and requesting of schemes
- Adoption and review of schemes

## The scheme "*manager*"

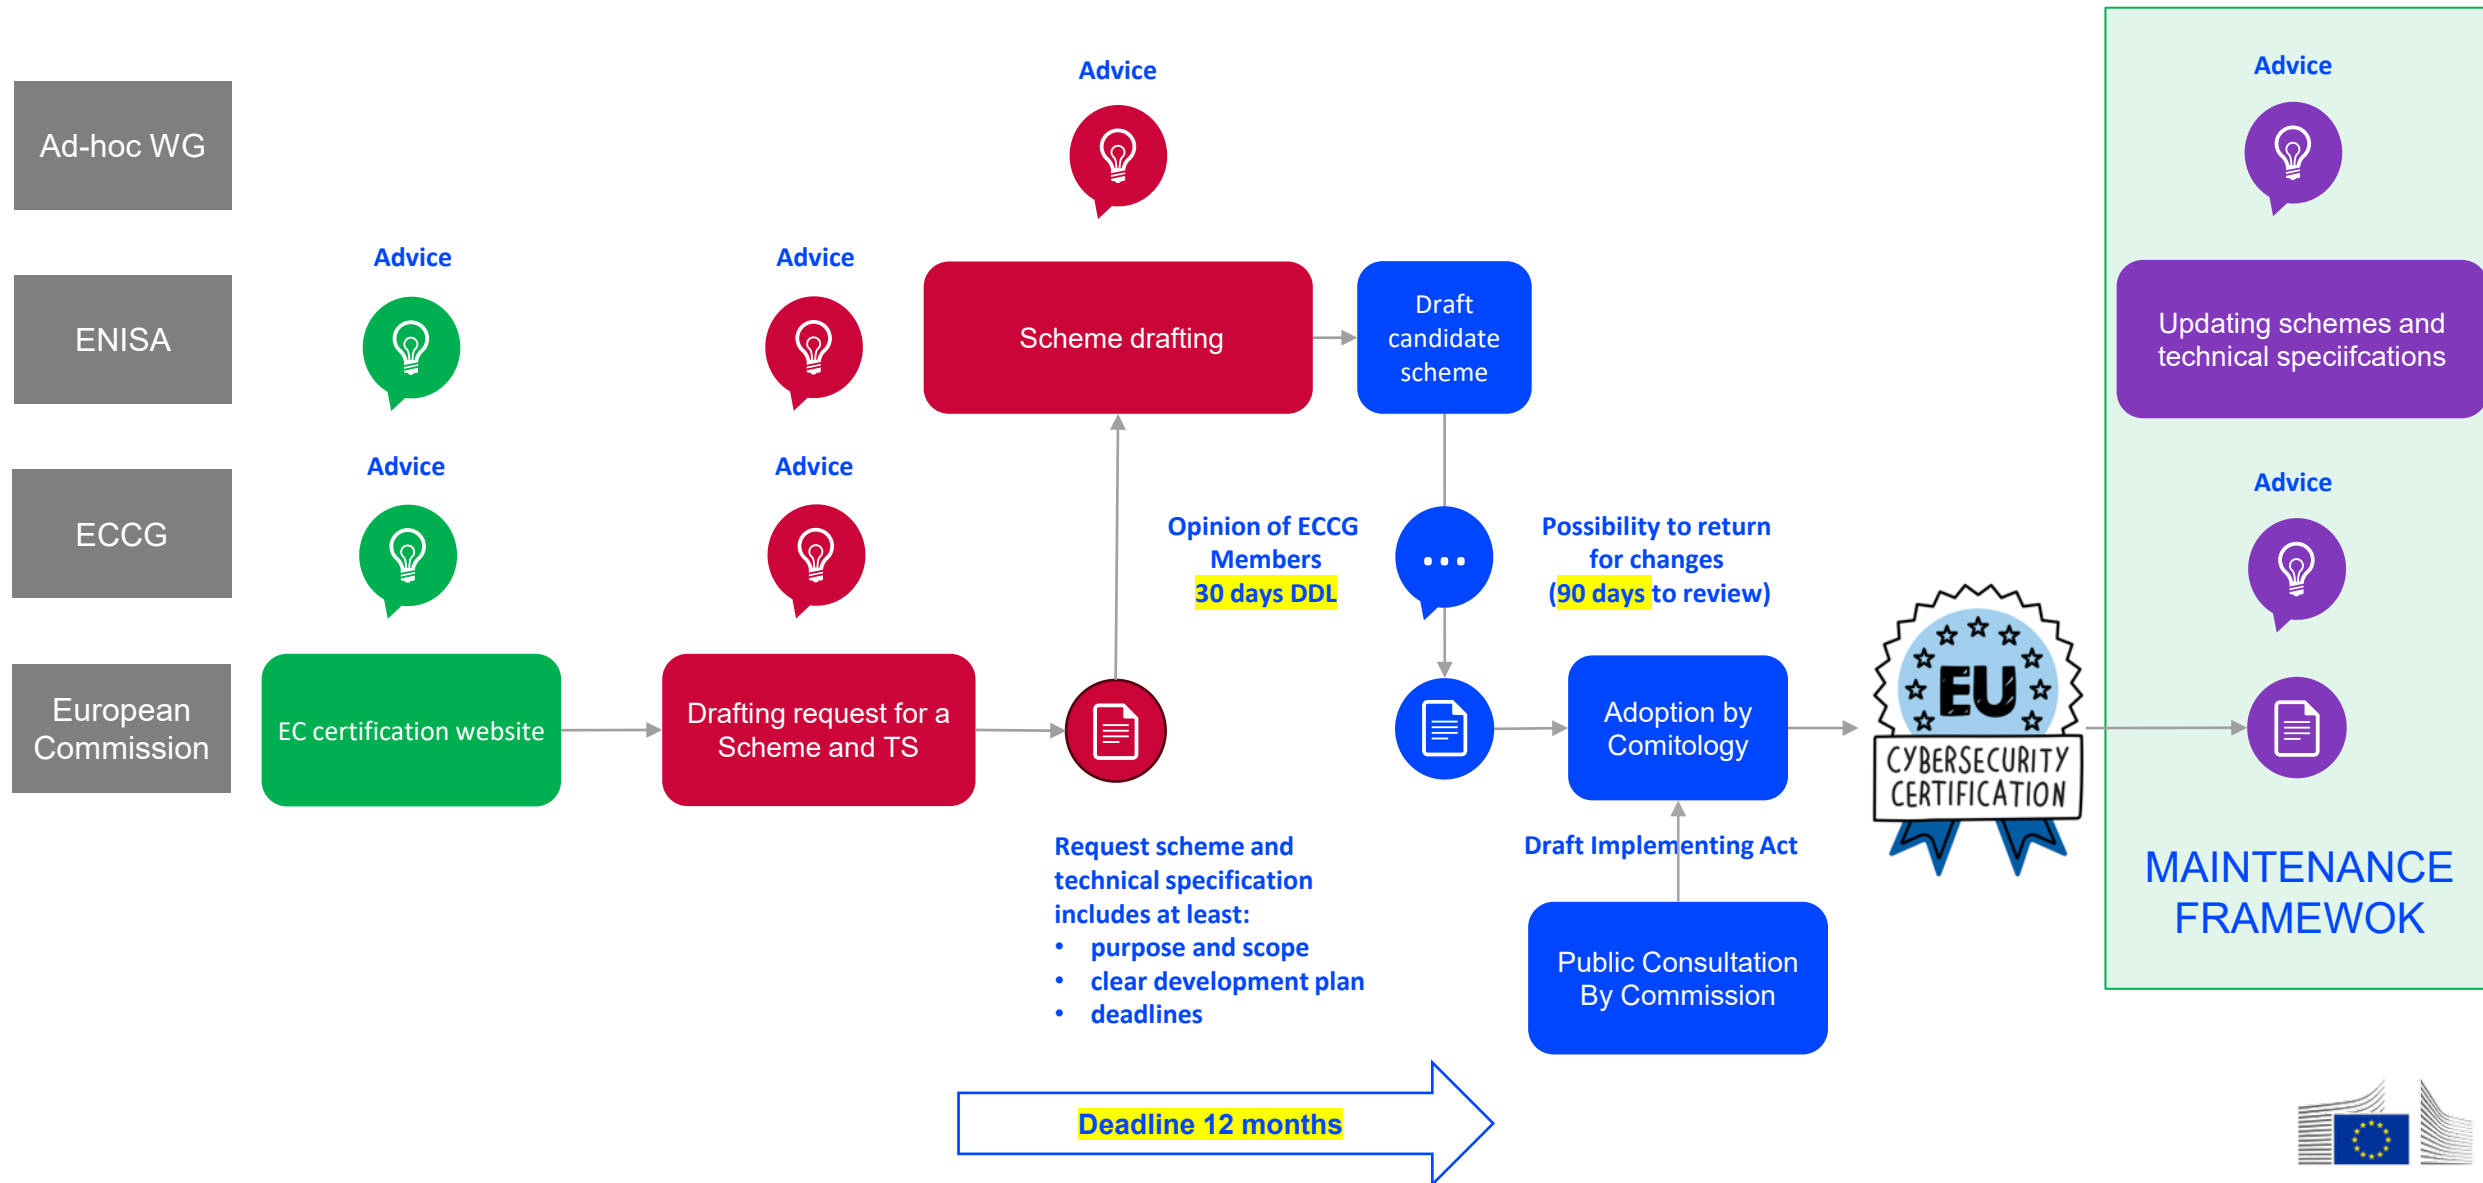

- Scheme development and maintenance
- Support of policy implementation
- Developing certification ecosystem

## The scheme "*implementor*"

- Consulted in every step of the way (ECCG, Comitology)
- Certification issuers through NCCAs
- Accreditations and authorisations
- Supervision

# Streamlined procedure promoting accountability

# Enhanced transparency and stakeholder engagement

## Regulation 2019/881:

- ENISA certification website
- Comitology
- Stakeholder input in scheme development
- ~~Union Rolling Work Programme~~
- ~~Stakeholder cybersecurity certification group~~

## The new CSA2:

- ENISA certification website
- Comitology
- Stakeholder input in scheme development +
- **European Cybersecurity Certification Assembly** (new)
- **COM certification website** (new)
- More public consultations
