ANSSI'S QUALIFIED SERVICES

Genesis of a qualification scheme

Historically, ANSSI's mission has been to assist public institutions and critical French entities. With the multiplication of entities, the agency has neither the **capacity** or the **legitimacy** to respond to all their requests.

To meet the need to support critical entities, ANSSI has decided to **rely on private sector** to carry out a number of these missions. Public institutions within its **exclusive remit**.

To ensure the competence of private-sector players in these critical areas, ANSSI has set up **several qualification schemes** covering part of its operational activities.

Focus : Cybersecurity services

PASSI, PRIS, PDIS, PACS and PAMS

Cover a vast spectrum of qualified cybersecurity services

Qualification scheme has different scopes to specify each field of application of the standard.

Create a loop of qualified company

Qualified service providers capable of intervening on several or all services. Recently adding PACS scheme that integrate consulting services.

Adapt our schemes to European landscape

With the transposition of the European directive, we need to apply a number of adaptations to these schemes, such as levels of confidence.
