II.1.4) Short description of the contract or purchase(s)

Provision of specialised services for supporting and enhancing CERTs' operational capabilities. The services required have been presented as 3 lots, with the specific requirements for each lot as follows:

a) lot 1: further definition and deployment of baseline capabilities for national/governmental CERTs.

The European Commission specified the target deadline for establishing well-functioning national/governmental CERTs in all Member States by the end of 2012. Since 2005, ENISA has supported Member States in this

regard, and in 2008 the Agency started to specify baseline technical and policy recommendations of national/ governmental CERTs. ENISA aims at procuring services in order to:

— assess the level of compliance with those baseline capabilities in the EU MS,
— further discuss the baseline capabilities with the CERTs; to adjust and where appropriate extend. A special emphasis will be put on good practice in national and regional cooperation;

b) lot 2: further development of capabilities to provide training and exercises for CERTs.

Provision of services in order to create:

— updated and extended collection of the CERT exercise material,
— report with a roadmap on how to prepare ENISA for a more (pro)active provision of training and exercises for CERTs;

c) lot 3: proactive detection of security incidents: honeypots.

Provision of services in order to:

— produce a good practice document on NIS early warning, situational awareness and proactive detection of incidents,
— new exercise scenario to be fed into ENISA exercise and training material.
