Work 2006 in Risk Management: Del. 1, www.enisa.europa.eu/rmra

Presentation for the ENISA Workshop on Risk Management

13th Oct. 2006

Rome

Dr. L. Marinos

Issues addressed

- Low awareness of Risk Management/Risk Assessment activities
- Absence of a “common language” in the area of Risk Management to facilitate communication
- Lack of surveys on existing methods, tools (and good practices)

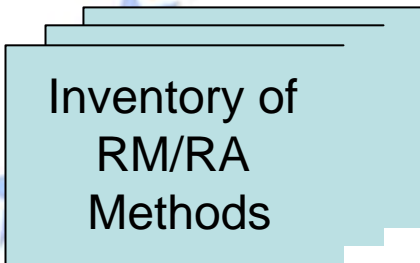

Contents of the deliverable (I of II)

Technical description with:

- RM/RA process/methods
- Phases
- Contents
- ISMS
- Glossary

- A main report with:
- The strategic framework of risk management
- Risk Assessment, Risk Management: Phases and their relationships
- Positioning Risk Management / Risk assessment within ISMS
- Glossary of RM/RA terms

Contents of the deliverable (II of II)

Inventory of
RM/RA
Methods

Inventory of
RM/RA
Tools

- All inventories based on templates:
- Template for methods provided by WG, 21 attributes. 13 methods considered
- Template for tools provided by ENISA, 22 attributes. 12 tools considered
- Attributed presentations are used for comparisons in both cases

And the general structure..

Present and future..

- **Now**
- The template is appropriate description of methods/tools
- The comparability of methods is possible
- **Future**
- Submission of new methods/tools has to be introduced
- The interoperability of methods has to be initiated
- Examples will be introduced and comparability will be enhanced

Few first reactions on Web-Site...

- Two PSG members found it “very good”
- The few experts test wise conducted characterized it as “unique in the area”
