

European Vocation Training Association

FIGURES

- 23 members in 14 countries
- 50.000 employees (approx.)
- Approximately 1.000.000 people trained a year
- In about 2000 training centers

CURRENT SITUATION

- WEBSITE : <http://www.evta.net>
 - MAP OF EUROPE
- EXEMPLO DATABASE :
 - GOOD PRACTICES
 - COMMUNITIES
 - WHO's WHO
- EACH MEMBER HAS ITS OWN WEBSITE

AFTER 10 YEARS

- EVTA is an association whose members work independently, while providing complementary and/or similar services
- EVTA is attempting to federate these services either via a centralised portal, or using an integrated system of decentralised portals, adapted to members' requirements

SITUATION END 2006

- We are launching a portal in November, 2006
- The portal has been conceived as an industrial site:
 - 5 buildings, each with:
 - 6 floors, each with:
 - 6 offices
- A single sign-on procedure is required
- Services are federated
- Content is shared

EVTA & RISK MANAGEMENT

- We have to make an analysis of the risks regarding :
 - The Infrastructure
 - Hardware & Network
 - The identity management
 - Definition of a global policy of the different IM systems of the organisations
 - Definition of the identity procedures (users, roles, revocation, access management)
 - The federated services
 - Bringing together the right user with the right content

EVTA & RISK MANAGEMENT

- Our big problem is reconciling the desire of internet users who insist that it remain freely accessible, and unconstrained, with ICT managers' security concerns, as experience has shown that their way of working invariably leads to very closed and boring IT solutions

EVTA & RISK MANAGEMENT

- EVTA will offer its member organisations the possibility of implementing the material related to Risk Management as a training module
- The agenda of each EVTA PORTAL MEETING will include the following themes :
 - Risk management awareness raising
 - Main goals of Risk Management

EVTA & RISK MANAGEMENT

■ QUESTION

- Would it be possible to come to a more structured collaboration between ENISA and EVTA ?
- Would ENISA be prepared to consider treating EVTA and its network as a test case in risk management?

EVTA
